FBR – TECHNOLOGICAL RIGOR AND ECOLOGICAL RESPECT

F.B.R.'s first aim has always been research of the best in technology. Our products are only marketed after stringent trials using the latest in industry led testing procedures with respect and consideration given to any issue relating to the ecological and environmental impact. F.B.R. is qualified by the Quality Management System ISO 9001 and all our products are certified and conform to the current CE norms.

FBR – RIGORE TECNOLOGICO E RISPETTO ECOLOGICO

Ricercare il meglio tecnologico è il nostro impegno da sempre. I prodotti F.B.R. nascono da costanti verifiche, rigorose e d'avanguardia, ponendo particolare attenzione alle tematiche del rispetto ecologico e dell'impatto ambientale. I nostri prodotti sono conformi e certificati secondo le vigenti norme CE e la nostra azienda è certificata con il Sistema Qualità ISO 9001.

Knowledge and updating
at FBR Training Centre

100% MADE in ITALY

Since 1969 HIGH-TECH burners

We are the right partner for the distributor with Quality as absolute value.

Since 1969 we have designed and manufactured high-tech burners for industrial and civil applications. In addition to the standard product range, F.B.R. also supplies high power burners and burners for alternative fuels such as biodiesel, "BTZ" (low sulfur oil) and vegetable oils (i.e. colza oil, sunflower oil).

FBR's sound experience together with an open and innovative spirit results in our products being appreciated on the principal international markets: currently our burners are distributed to 80 nations throughout the world.

The diffusion of knowledge with its continuous updating is guaranteed through specific training courses held by our qualified technicians within our own F.B.R. Training Centre.

Siamo il partner ideale degli Installatori che puntano alla Qualità come valore assoluto.

Dal 1969 progettiamo e costruiamo bruciatori ad alto contenuto tecnologico per applicazioni industriali e civili. Oltre alle realizzazioni standard qui presentate, FBR può fornire versioni speciali quali bruciatori di grandi potenzialità e bruciatori per combustibili alternativi di Biodiesel, BTZ (basso tenore di zolfo) e oli di origine vegetale (come olio di colza, olio di semi di girasole).

La consolidata esperienza F.B.R. unita ad uno spirito aperto e innovativo ci hanno permesso di fare apprezzare i nostri prodotti sui principali mercati internazionali: la distribuzione dei nostri bruciatori interessa ad oggi 80 nazioni nel mondo.

La diffusione delle competenze e il continuo aggiornamento sono garantiti attraverso corsi di formazione specialistici, tenuti dai nostri tecnici qualificati presso il Centro di Formazione interno F.B.R, rivolti agli Operatori del settore.

80 nations all over the world

Our job is to focus on your requirements

Mettere a fuoco le vostre esigenze è il nostro lavoro

Ultra Low NOx FGR

FBR R&D Lab always looking for better performance

FBR combustion and electronics experts are fully dedicated to the analysis and implementation of new technological solutions that guarantee excellence in performances and reliability.

Our Research & Development team is constantly looking to better performance using the very latest in three dimensional CAD systems and a fully equipped laboratory together with a hi-tech simulated working environment. Particularly the laboratory of research & development is equipped with precise electronic paramagnetic infrared and ultraviolet devices of combustion analysis, digital multiscale phonometries, an evolved oscilloscope interfaced to a computerized data collecting system and integrated and multifunctional tools for performance analysis and long duration testing.

Il team di esperti FBR nella combustione e nell'elettronica è dedicato a tempo pieno all'analisi ed all'implementazione di nuove soluzioni tecnologiche che garantiscano l'eccellenza in termini di prestazioni e di affidabilità.

Nella ricerca delle migliori prestazioni il nostro team si avvale di strumentazioni costantemente aggiornate quali il sistema CAD tridimensionale, l'ampio e attrezzato laboratorio di ricerca e le sale di prova attrezzate per simulare le più difficili condizioni di funzionamento. In particolare, il laboratorio di ricerca e sviluppo è dotato di precisi dispositivi elettronici di analisi di combustione paramagnetici ad infrarossi e ultravioletti, di fonometri digitali multiscale, di un evoluto oscilloscopio interfacciato ad un sistema computerizzato di rilevazione dati e di strumenti integrati e multifunzionali per verifiche ed analisi di performance e test di lunga durata.

Customized design

At FBR a consolidated team of technicians and designers is committed day after day to turn the most demanding requirements and unexpressed needs into concrete and innovative projects. Listening to the Client and proposing new solutions: on this premise we develop the accurate designing of products to be even more reliable and up-to-date.

In FBR un consolidato team di tecnici-progettisti è impegnato giorno dopo giorno a trasformare le richieste più esigenti e le necessità inesprese in progetti concreti e innovativi. Ascoltare il Cliente e proporre nuove soluzioni: su queste premesse si sviluppa l'accurata progettazione di prodotti sempre più affidabili e d'avanguardia.

Vi invitiamo a contattare i ns. Uffici Tecnico-Commerciali per i dati tecnici di dettaglio.

INDUSTRIAL BURNERS

BRUCIATORI INDUSTRIALI

Industrial burners are designed for residential plants and industrial processes that need high heating powers. The actual range is characterized by duo block burners with separated ventilator to be installed based on specific and real technical needs (ventilator not included).

When a significant amount of heating is needed, a single ventilator is able to work for more industrial burners, simplifying the entire heating plant. It's possible to use pre-heated combustion air, taking advantage of heat recovery from flue gases.

Available for the use of different types of fuel (light oil, heavy oil, natural gas, LPG), the industrial burners can be customized based on final plant characteristics and Your real needs. Thanks to last technical innovations, the industrial burners are easy to be installed. Available both mechanical and electronic version.

Please contact our Technical & Sales Offices for the study of Your specific needs.

Le testate industriali sono progettate per impianti civili e processi industriali che richiedono grandi potenze termiche. La gamma sviluppata si caratterizza per la predisposizione all'installazione del ventilatore dissociato, da abbinare separatamente sulla base delle specifiche tecniche.

Nelle situazioni di rilevante fabbisogno termico, un singolo ventilatore può asservire più testate industriali, conseguendo la semplificazione dell'impianto. È possibile impiegare aria comburente preriscaldata, sfruttando il recupero termico proveniente dai gas di scarico della caldaia.

Disponibili per l'utilizzo dei diversi tipi di combustibile (gasolio, olio combustibile, gas metano, G.P.L.), sono personalizzabili in funzione delle caratteristiche dell'impianto finale e delle Vostre reali esigenze. Le recenti innovazioni rendono le testate industriali di facile installazione. Disponibili anche nella versione con camma meccanica e camma elettronica.

Vi invitiamo a contattare i ns. Uffici Tecnico-Commerciali per lo studio delle Vostre applicazioni specifiche.
